

Box Project Member Testimonial

My mother has been sending boxes to her family in Mississippi since about 1968, almost 35 years. I remember as a child, helping mom make a quilt to send to our family. That was to be the first quilt of many. We had such fun deciding what to include in the boxes. Now, 200 quilts later I am sending my own boxes of quilt fabric to a veteran quilter in Gee's Bend Alabama. I read about her in a book that I bought about the quilters of that area. Last night she called me and I was thrilled to talk to her for the first time. I just wanted you to know that the Box Project has had a ripple effect, like dropping a stone into a pool of water.
